

erlang学习(1)

李小红 lixiaohong@gmail.com

黄冬 huangdong@gmail.com

你将会学到

- 如何安装
- say Hello 给 world
- 一个简单的TCP Client
- 进程、消息

安装

必要资源

- Erlang网站
- <http://www.erlang.org>
- 你所需要的
 - otp_doc_html_R12B-0.tar.gz
 - otp_src_R12B-0.tar.gz
- <http://www.erlang.org/download.html>

解包、配置与安装

```
# tar xzvf opt_src_R12B-0.tar.gz  
# cd opt_src_R12B-0/  
# ./configure  
# make  
# make install
```

Hello 下 world

交互式Hello

```
HD@~$erl
```

```
Erlang (BEAM) emulator version 5.6 [source] [smp:2] [async-threads:0] [kernel-poll:false]
```

```
Eshell V5.6 (abort with ^G)
```

```
1> io:format("Hello world~n").
```

```
Hello world
```

```
ok
```

```
2> q().
```

```
ok
```

```
3> HD@~$
```

让程序say Hello

声明了
我是谁

怎么用我里面
的方法

```
-module (helloworld).  
-export ([sayhello/0]).  
  
sayhello () ->  
    io:format("Hello World~n").|
```

编译、运行

```
$erlc helloworld.erl
```

```
$ls -l
```

```
total 32
```

```
-rw-r--r-  1 HD  HD   636 12 25 14:57 helloworld.beam
```

```
-rw-r--r-@ 1 HD  HD    93 12 25 14:53 helloworld.erl
```

```
$erl
```

```
Erlang (BEAM) emulator version 5.6 [source] [smp:2] [async-threads:0]  
[kernel-poll:false]
```

```
Eshell V5.6 (abort with ^G)
```

```
1> helloworld:sayhello().
```

```
Hello World
```

```
ok
```

```
2> q().
```

```
ok
```

```
3> $
```

一个简单的TCP客户端

需求

- 建立一个TCP连接到一个WEB服务器
- 将服务器返回的数据显示出来

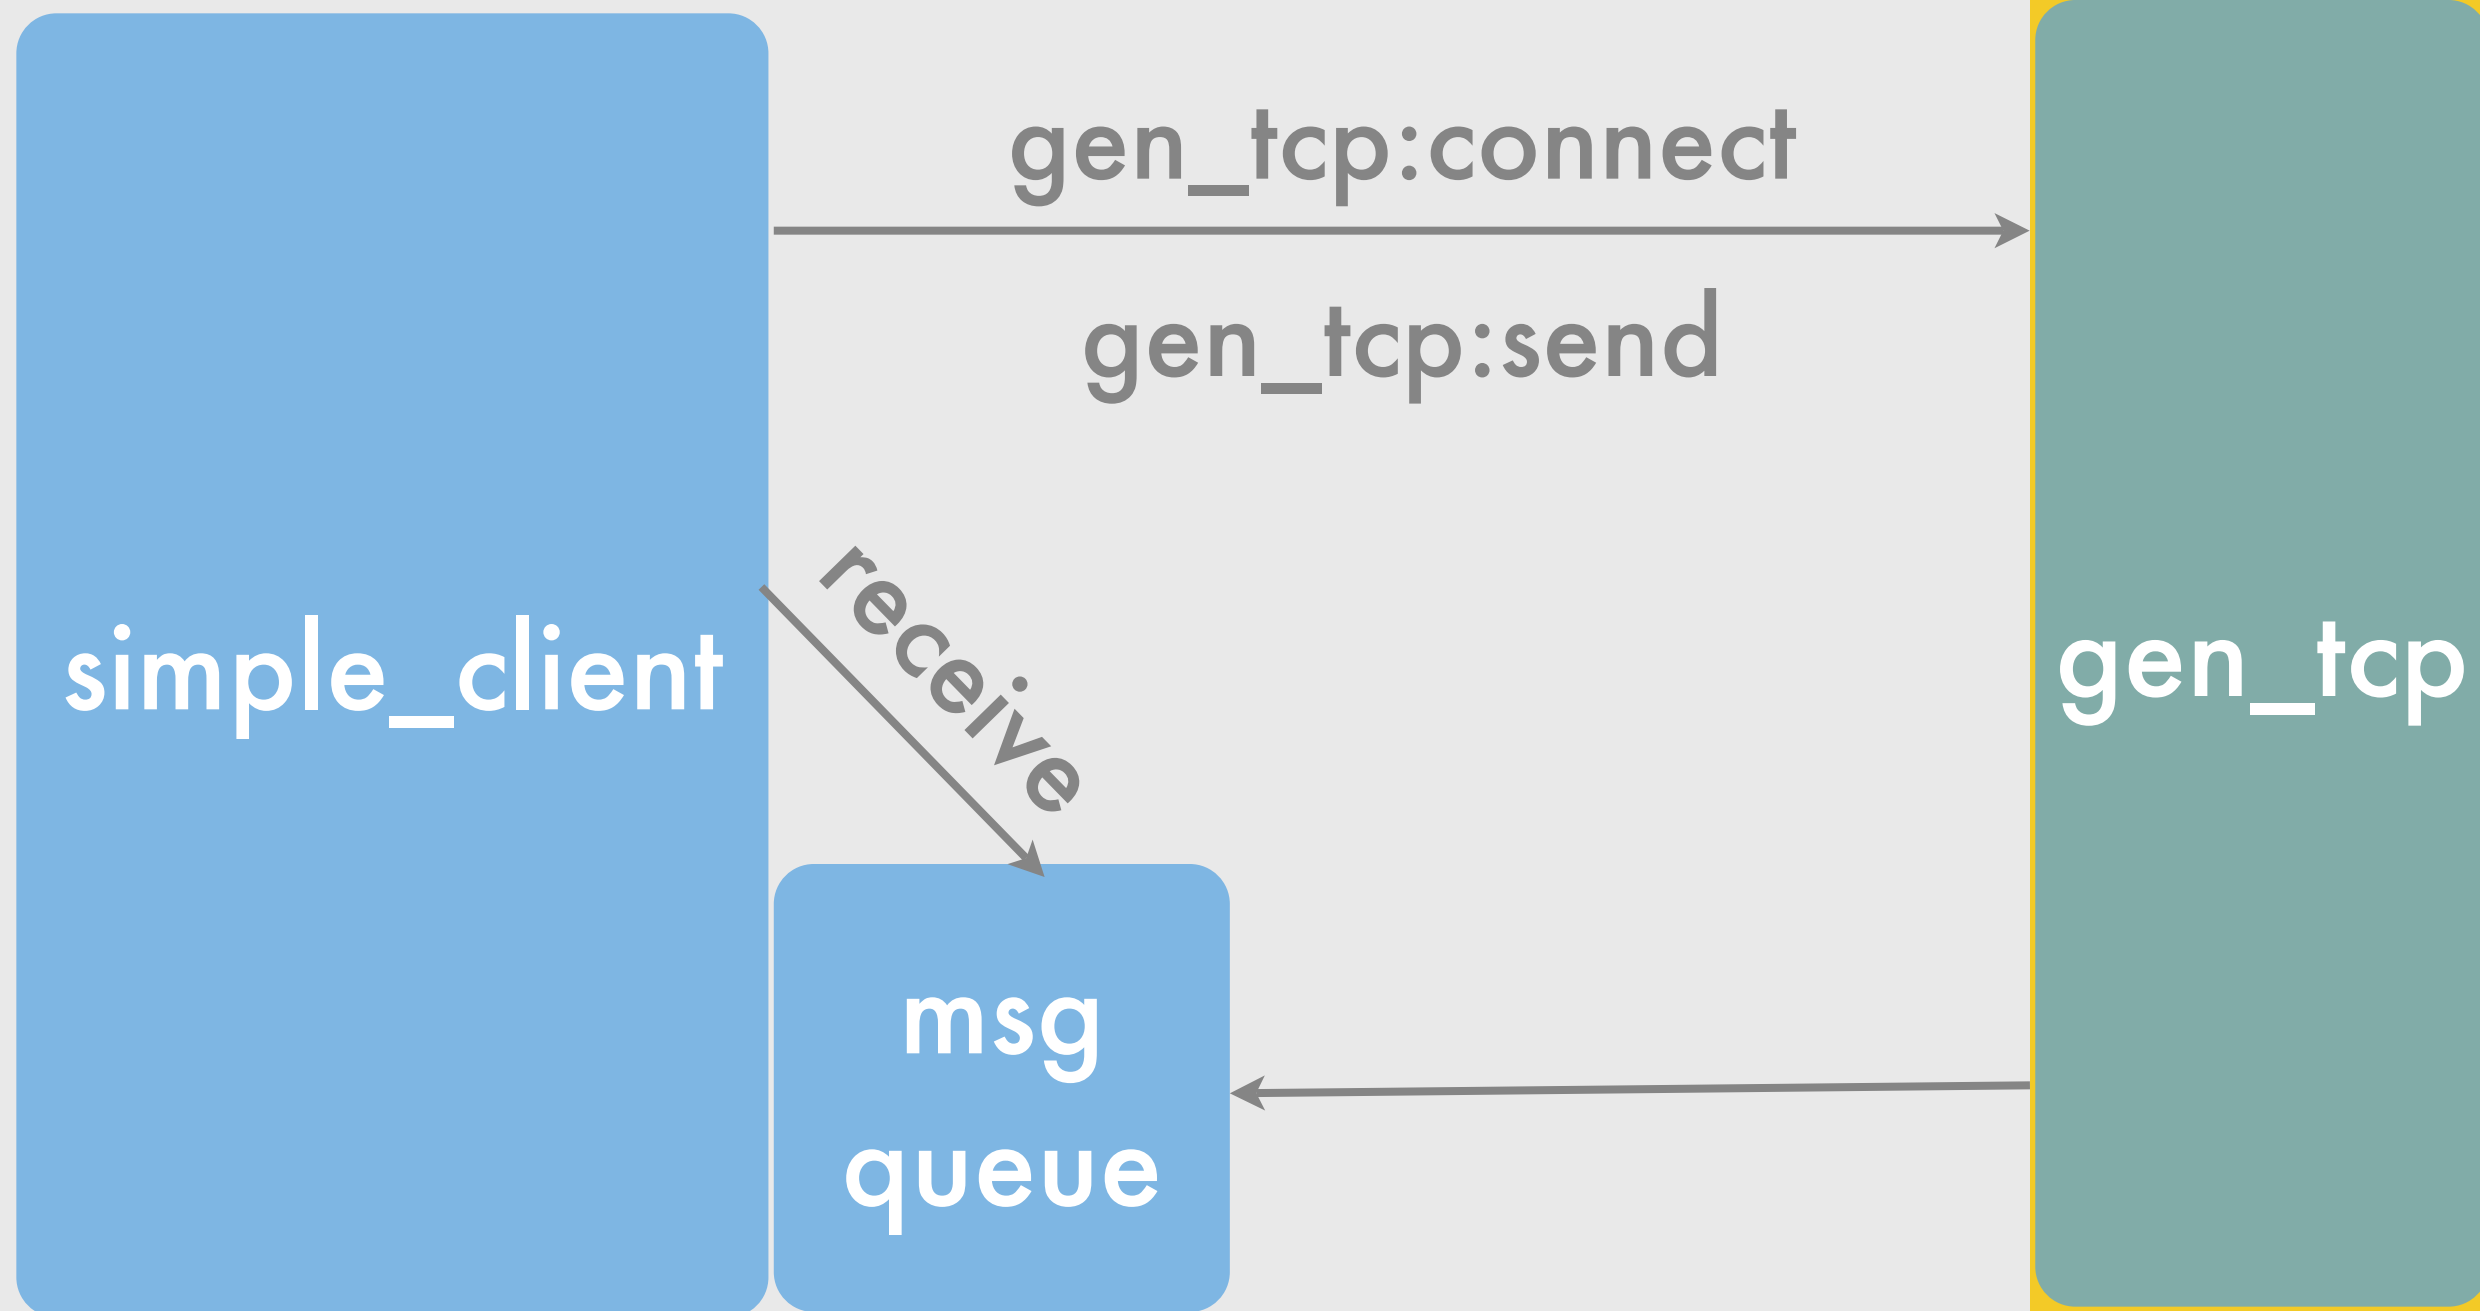

先来代码

```
-module (simple_client).  
-export ([nano_get_url/0,nano_get_url/1]).  
  
nano_get_url ( ) ->  
    nano_get_url("www.sina.com.cn").  
nano_get_url (Host) ->  
    {ok,Socket}=gen_tcp:connect(Host,80,[binary,{packet,0}]),  
    ok=gen_tcp:send(Socket,"GET / HTTP/1.0\r\n\r\n"),  
    receive_data(Socket,[]).  
receive_data (Socket,SoFar) ->  
    receive_  
        {tcp,Socket,Bin} ->  
            receive_data(Socket,[Bin|SoFar]);  
        {tcp_closed,Socket} ->  
            list_to_binary(lists:reverse(SoFar)).  
end.
```

发起连接

能看懂的举手！

消息

创造进程

- 创建一个新的进程，新进程执行Fun函数
- `pid=spawn(Fun)`
- 将进程号注册成通用的名字
- `register(name, Pid))`
- 将自己的进程号(`self()`)参数传给新进的进程

消息的发送

- `pid ! Message`
- 将消息发给Pid所标识的进程，消息发送是异步发送的。发送者执行时不会阻塞，不需等待会继续执行后边的代码
- 执行后返回Message，这样你就可以用类似 `Pid1 ! Pid2 ! Pid3 ! Message`的方式，给三个进程发送消息

消息接收

receive

Pattern1 [when GuardSeq1] ->
Body1;

...;

PatternN [when GuardSeqN] ->
BodyN

after

ExprT ->
BodyT

end

递归、模式匹配

模式匹配

递归

```
receive_data(Socket, SoFar) ->
  receive
  {tcp, Socket, Bin} ->
    receive_data(Socket, [Bin|SoFar]);
  {tcp_closed, Socket} ->
    list_to_binary(lists:reverse(SoFar))
  end.
```

运行与测试

```
[xiaohong@localhost test]$ erlc simple_client.erl
```

```
[xiaohong@localhost test]$ ls -l
```

```
total 8
```

```
-rw-rw-r-- 1 xiaohong xiaohong 952 Dec 25 17:43 simple_client.beam
```

```
-rw-rw-r-- 1 xiaohong xiaohong 526 Dec 25 17:43 simple_client.erl
```

```
[xiaohong@localhost test]$ erl
```

```
Erlang (BEAM) emulator version 5.6 [source] [async-threads:0] [hipe] [kernel-poll:false]
```

```
Eshell V5.6 (abort with ^G)
```

```
1> A = simple_client:nano_get_url().
```

```
<<"HTTP/1.0 403 Forbidden\r\nServer: CachePower/1.3.1.dev\r\nMime-Version: 1.0\r\nDate: Tue, 25 Dec 2007 01:44:38 GMT\r\nContent-Type: text/plain\r\n\r\n" >>
```

格式化输出

```
2> io:format("~p~n",[A]).
```

```
<<"HTTP/1.0 403 Forbidden\r\nServer: CachePower/1.3.1.dev\r\nMime-Version:  
1.0\r\nDate: Tue, 25 Dec 2007 01:44:38 GMT\r\nContent-Type: text/html\r  
\nContent-Length: 1059\r\nExpires: Tue, 25 Dec 2007 01:44:38 GMT\r\nX-Squid-  
Error: ERR_ACCESS_DENIED 0\r\nX-Cache: MISS from 152-66.sina.com.cn\r  
\nConnection:
```

```
.....
```

```
HREF=\"mailto:webmaster\">webmaster</A>. \n\n\n<BR clear=\"all\">\n<HR  
noshade size=\"1px\">\n<ADDRESS>\nGenerated Tue, 25 Dec 2007 01:44:38  
GMT by 152-66.sina.com.cn (CachePower/1.3.1.dev)\n</ADDRESS>\n</BODY></  
HTML>\n">>
```

```
ok
```

字符串处理

```
3> string:tokens(binary_to_list(A),"\r\n").  
["HTTP/1.0 403 Forbidden","Server: CachePower/1.3.1.dev",  
"Mime-Version: 1.0","Date: Tue, 25 Dec 2007 01:44:38 GMT",  
"Content-Type: text/html","Content-Length: 1059",  
"Expires: Tue, 25 Dec 2007 01:44:38 GMT",  
"X-Squid-Error: ERR_ACCESS_DENIED 0",  
"X-Cache: MISS from 152-66.sina.com.cn","Connection: close",
